PROFESSIONAL SUMMARY

Aspiring DevOps Engineer transitioning from a commerce background, with hands-on experience in CI/CD pipelines, Docker containerization, and AWS cloud infrastructure. Completed Accenture's Development & Advanced Engineering Virtual Experience and hold a SAS Certified Specialist credential. Passionate about automation, infrastructure-as-code, and continuous learning. Seeking an entry-level DevOps or Cloud Support role to contribute and grow with an experienced team.

TECHNICAL SKILLS

DevOps Tools: Jenkins, Docker, Git, GitHub, Kubernetes (learning)

Cloud Platforms: AWS (EC2, S3)

Scripting & Programming: Python, Bash Shell Scripting

Operating Systems: Linux (Ubuntu/CentOS)

Monitoring: Prometheus, Grafana (basic)

Other: CI/CD Pipelines, Infrastructure Automation, OOP, Agile Planning, Code Refactoring

PROJECTS

Automated Web Application Deployment | **Personal Project** | 2023 | *Hyderabad*

- Designed and deployed a fully automated CI/CD pipeline using Jenkins and GitHub, eliminating manual deployment steps for a Python Flask web application.
- Containerized the application using Docker and Docker Compose, ensuring consistent and portable environments across development and production.
- Deployed the application on AWS EC2 with S3 for static asset storage; implemented basic uptime monitoring using open-source tools (Prometheus).
- Practiced Infrastructure-as-Code principles by scripting environment setup with Bash, reducing configuration time significantly.

VIRTUAL EXPERIENCE

Development & Advanced Engineering Virtual Experience | **Accenture (via Forage)** | Jun 2023 – Jul 2023 | *Remote*

- Completed a self-paced engineering simulation covering real-world DevOps and software development practices used at Accenture.
- Implemented Continuous Integration (CI) workflows, understanding automated build and test pipeline concepts.
- Applied Object-Oriented Programming principles and performed Code Refactoring for improved code maintainability.
- Practiced Agile Planning techniques including sprint planning, task breakdown, and iterative delivery.

CERTIFICATIONS

SAS Certified Specialist: Base Programming Using SAS 9.4 — SAS Global Certification Program, May 2022 | ID: VQHBF3QCJJQ1Q555

Coding: Development & Advanced Engineering Virtual Experience — Accenture / Forage, July 2023 | ID: q64rCzsGwexgvcBtq

Introduction to Model Context Protocol (MCP) — Anthropic, March 2026 | ID: zov6dogkaviu | verify.skilljar.com/c/zov6dogkaviu

EDUCATION

Bachelor of Commerce (BCom), Accounting and Finance

Satavahana University, Karimnagar, Telangana | Aug 2017 – Dec 2020

- Self-taught Linux, Python, and Bash scripting alongside degree coursework to build a strong foundation for transitioning into DevOps engineering.
